Difficulty in Wedding Planning —

Inadequate Financial Tracking

Monitoring and managing wedding expenses across various categories without a unified system is challenging.

Inefficient Wedding Planning Processes

Traditional wedding planning involves juggling multiple tools and platforms, leading to disorganization and increased stress.

Event Wise Guest Segmentation Challenges

Managing large guest lists without proper grouping makes it difficult to determine which guests are attending which ceremonies, resulting in incorrect invitations, planning errors and confusion during multi event weddings.

Difficulty in Managing Accommodations and Transportation

Coordinating guest accommodations and transportation services without a streamlined system results in confusion and inefficiency.

Lack of Secure and Controlled Event Entry

Traditional invitation methods do not provide a reliable way to verify guests at the venue, making it difficult to prevent unauthorized entry and manage crowd flow at large wedding events.

Complicated Invitation Management

Sending and tracking personalized invitations can be cumbersome and prone to errors.

[Know More »](#)

Lack of Real-Time Guest Communication

Guests often miss out on important updates due to the absence of a centralized communication system.

Limited Photo and Video Sharing Capabilities

Sharing and organizing event photos and videos before, during and after the wedding can be inefficient without an integrated platform.

Unstructured Task and Volunteer Coordination

Assigning responsibilities to family members or volunteers without a proper system often leads to unclear ownership, missed tasks, repeated follow ups and last minute chaos during wedding execution.

Complex Hotel and Room Management

Registering and managing hotel bookings, assigning rooms and tracking availability can be time-consuming and error-prone.

Vehicle Coordination Challenges

Managing transportation requests, assigning vehicles and drivers and keeping guests informed about their transportation status is often complicated without a dedicated system.

Need for On-Site Support

Hosts may require dedicated assistance during the event for smooth operations.

Why Wedvista? —

01

Built for Real Wedding Challenges

WedVista is designed around the actual problems families face while planning weddings, such as managing guests, coordinating tasks, handling invitations and tracking multiple events without confusion.

02

All-in-One Wedding Management Platform

From guest management and invitations to accommodation, transportation, task delegation and expense tracking, WedVista brings every critical wedding function into one organized system.

03

Clear Coordination Without Follow-Ups

With task management, real-time updates and notifications, everyone involved knows their responsibilities, reducing manual follow-ups and last-minute chaos.

04

Smart and Secure Guest Handling

Features like QR code based invitations, event-wise guest grouping and RSVP tracking ensure smooth communication, controlled entry and better guest experience.

05

Technology That Simplifies, Not Complicates

WedVista replaces spreadsheets, calls and scattered chats with a simple digital platform that keeps families informed and in control at every stage of the wedding journey.

06

Trusted by Families

WedVista is used by families and service providers to plan weddings more efficiently, delivering organized execution, better visibility and stress-free celebrations.

[Know More »](#)

Guest Management

Enable you to efficient organization and communication with your wedding guests. It simplifies the creation of guest groups, the sending of personalized invitations and the tracking of RSVPs, ensuring a smooth and organized planning process.

Pain points we solve

- **Complex Guest Organization**
- **Efficient Communication**
- **Accurate RSVP Tracking**
- **Administrative Efficiency**
- **Accurate Guest Information**

[Know More »](#)

Invitation Management —

Our Invitation Management Module streamlines the process of sending and tracking invitations. This feature ensures that every guest receives the right invitation and helps you keep track of responses, making your wedding planning smoother and more organized.

Pain points we solve

- Guest Grouping Complexity
- Personalized Invitation Creation
- Efficient Invitation Sending
- Invitation Tracking
- Administrative Burden

[Know More »](#)

Task Management —

One of the biggest challenges in wedding planning is repeatedly following up with family members and volunteers to ensure tasks are completed on time. WedVista removes this stress by allowing hosts to assign tasks with clear ownership, priorities and deadlines, while tracking progress in real time through the mobile app. Automated notifications and updates ensure accountability, helping every responsibility get completed smoothly without constant reminders.

Pain points we solve

- Repeated follow-ups to ensure tasks are completed
- Unclear task ownership causing delays
- Last-minute confusion due to manual coordination
- No real-time visibility into task progress
- Increased stress for hosts during execution

[Know More »](#)

Personalize Website —

The Personalize Website allows couples to create a custom wedding website that shares detailed information about the bride and groom, their love story, venue details, events and media. It also enables guests to log in and perform various operations such as updating family member details, defining attendees, requesting pickups and drops, requesting accommodations and viewing assigned hotel details and contact information.

Pain points we solve

- › Information Dissemination
- › Guest Self-Service
- › Enhanced Engagement
- › Comprehensive Access

[Know More »](#)

Mobile App

The Mobile App extends the functionality of our wedding planning platform to mobile devices, offering three distinct logins: guest, driver and admin. Guests can access all features available on the website, including event details, media and request management. The driver app allows drivers to view and complete assigned pickup/drop tasks. The admin app enables real-time notifications to guests, creation of guest groups, adding guests from the mobile contact list and viewing all guest-accessible information.

Pain points we solve

- › **Limited Accessibility**
- › **Disjointed Communication**
- › **Administrative Overload**
- › **Task Management for Drivers**
- › **Guest Information Gaps**
- › **Operational Inefficiencies**

[Know More »](#)

Event Management —

The Event Management allows for efficient management of all event-related responsibilities and guest requests. Define responsible persons for various departments, manage and respond to guest requests and complaints and share contact details of key event support staff. Guests can log in via the mobile app or website to see assigned personnel, raise additional requests and view responses from the admin.

Pain points we solve

- **Lack of Clear Responsibilities**
- **Inefficient Complaint Handling**
- **Communication Gaps**
- **Disconnected Experience**

[Know More »](#)

Expense Management —

The Expense Management enables guests to create and manage budgets for specific sections of their wedding, track all incurred expenses and generate detailed reports. Compare allocated budgets versus actual expenses and keep comprehensive records of each expense, including type, amount, payer, payment status, approver and approval date.

Pain points we solve

- Budget Management Challenges
- Expense Tracking Difficulties
- Financial Oversight
- Lack of Detailed Records

[Know More »](#)

QR Code based Invitation

Managing guest entry manually at wedding events often leads to confusion, long queues and security concerns. WedVista introduces QR code based invitations that allow guests to check in quickly and securely at the venue. Each guest receives a personalized QR code that is scanned at entry, ensuring smooth access control and real-time attendance tracking without manual verification.

Pain points we solve

- Manual guest verification causing long entry queues
- Difficulty preventing unauthorized guests from entering events
- No real-time visibility of guest attendance
- Confusion during peak arrival times
- Stress for hosts and volunteers managing entry manually

[Know More »](#)

Accommodation —

The Accommodation Module in allows admins to manage hotel bookings and room assignments efficiently. Admins can add hotels, set up rooms with their capacities and store contact information for all hotel departments. The Guest Allocation feature helps admins assign rooms based on capacity and keep track of occupied and vacant rooms. Once a room is allocated, guests can view hotel and room details through the website, notifications and mobile app. Guests can also see the hotel location on the mobile app.

Pain points we solve

- › **Complex Room Management**
- › **Inefficient Guest Allocation**
- › **Guest Communication Issue**
- › **Vacant Capacity Tracking Challenges**

[Know More »](#)

Pickup/Drop —

The Pickup and Drop Module streamlines transportation logistics for wedding events. Admins can manage vehicle assignments and track transportation requests, ensuring efficient and timely pickups and drops for guests. The driver app allows drivers to view and complete assigned tasks, while guests receive real-time updates on their transportation status through the website and mobile app.

Pain points we solve

- › **Complex Transportation Logistics**
- › **Communication Gaps**
- › **Inefficient Trip Management**
- › **Guest Uncertainty**
- › **Location Co-Ordination**
- › **Resource Allocation**

[Know More »](#)

Sharing —

Sharing allows couples and guests to upload and share media, enhancing the wedding experience. Couples can display their photos and videos on the website and mobile app, while guests can also upload their photos, which will be displayed after admin approval. This module ensures that all memorable moments are captured and shared seamlessly.

Pain points we solve

- Limited Guest Engagement
- Unorganized Media Sharing
- Quality Control
- Accessibility

10

Review and Suggestion

We will request you to share your review and suggestion based on your experience with WedVista.

Case studies —

Transforming Wedding Chaos into Harmony: The Patel Family's Experience with WedVista

Client

The Patel Family, a family planning their children's wedding, embarked on a monumental task of organising a large-scale celebration with over 500 guests. This included coordinating logistics for more than 200 out-of-town attendees who required accommodation and transportation. Faced with the overwhelming complexity of handling RSVPs, arranging accommodations, managing transportation, and keeping a close eye on the budget, the family sought a solution to turn their logistical chaos into a joyous, well-coordinated event.

Outcome

With WedVista as their all-in-one wedding planning partner, the Patel family transformed what could have been a logistical nightmare into a well-coordinated and stress-free event. The system allowed them to easily manage a guest list of over 500 people, track RSVPs, organize hotel and transportation logistics, and stay on top of their budget.

The family experienced no last-minute confusion or chaos—everything ran smoothly, from managing guest arrivals to resolving minor complaints. WedVista empowered them to keep every detail under control, providing peace of mind and allowing the Patels to focus on what truly mattered: celebrating their children's marriage.

Mrs. Patel expressed her gratitude, saying, "WedVista made all the difference. What could have been an overwhelming and stressful experience turned into a beautiful, seamless celebration. We could actually enjoy the wedding instead of worrying about the logistics."

For the Patel family, the wedding was not just memorable but magical, thanks to WedVista's careful orchestration. Every guest was looked after, every task was managed, and the budget remained intact—making their dream wedding come true.

Enhancing Guest Engagement and Communication

Client

Sarah and Mark aimed to create an immersive and engaging experience for their guests but struggled with keeping everyone updated and engaged throughout the planning process. They also needed a way to manage their wedding budget effectively.

Outcome

Sarah and Mark's guests were highly engaged and informed throughout the wedding planning process, thanks to the real-time communication capabilities of Wedvista. The instant notifications and updates reduced miscommunication and kept everyone on the same page. The expense tracking tools helped the couple stay within their budget, preventing overspending and allowing them to allocate funds more effectively. Their wedding was well-organized, financially stress-free and memorable for everyone involved.
